SUMMARY

Detail-oriented Business Analyst with 3+ years of experience across Healthcare, E-Commerce/ERP Integration, and CRM domains. Proven track record of translating complex business requirements into structured BRDs, FRDs, and user stories in Agile/Scrum environments. Skilled in Power BI, SQL, and REST API integration, with hands-on experience collaborating with US-based clients and cross-functional offshore teams to drive data-informed decision-making.

SKILLS

- Requirements Gathering
- BRD / FRD Documentation
- User Stories & Acceptance Criteria
- Agile
- Scrum
- SDLC
- JIRA
- Confluence
- Python
- SQL
- Power BI
- KPI Dashboards
- JAD Sessions
- Sprint Planning & Backlog Grooming
- Requirement Traceability Matrix (RTM)
- UAT Coordination
- Change Management
- Stakeholder Management
- Advance Excel
- Power Query
- API & Integration
- REST API Integration
- Data Mapping
- API Testing using Postman
- Lucidchart
- Microsoft Visio
- Figma
- UML Diagrams
- Business Process Modeling
- Business Process Optimization
- Gap Analysis
- Root Cause Analysis
- MoSCoW Prioritization
- Microsoft Office Suite
- Prompt Engineering (ChatGPT, Claude)
- Microsoft Copilot | Power BI Copilot

EXPERIENCE

ACCENTURE

Pune, Maharashtra, India

Business Analyst

06/2025 to Current

- Delivered end-to-end BA solutions for 3+ US-based clients across CRM, E-Commerce, healthcare, and finance domains, collaborating with 5–8 onshore stakeholders and 10+ offshore team members.
- Drove Agile delivery activities including backlog refinement, sprint planning, and story clarifications across 10+ sprint cycles covering workflow automation and system integration modules.
- Led requirements elicitation workshops and stakeholder interviews, documenting BRDs, FRDs, REST API integration requirements, and 25+ structured user stories with defined acceptance criteria.
- Facilitated cross-functional requirement walkthroughs across CRM, E-Commerce, healthcare, integration, and finance work streams, reducing requirement ambiguities and rework by 60%.
- Mapped current-state and future-state workflow models, identifying manual inefficiencies and enabling a 40% reduction in turnaround time through seamless system integrations.
- Built Power BI dashboards for senior leadership to monitor sales pipelines, collections, customer KPIs, and regional performance, maintaining 98% output accuracy.

PARANJAPE SCHEMES CONSTRUCTION LTD, PUNE

Pune, Maharashtra, India

Data Analyst (CRM)

07/2023 to 02/2025

- Processed and standardized 100,000+ row multi-source datasets using Advanced Excel, improving accuracy and reliability of weekly KPI dashboards across regions.
- Analyzed customer, financial, and operational data to identify revenue trends and monitor collections, directly supporting achievement of 95%+ revenue targets.
- Ensured 98% accuracy in financial reporting through rigorous data reconciliation of payment plans, invoices, and bank statements.

PROJECTS

1. E-Commerce & ERP Integration Platform

Client: Apex Retail Systems, USA

Tools: JIRA, Confluence, Lucidchart, REST API, Postman

- Conducted end-to-end requirements elicitation using MoSCoW prioritization, documenting 25+ functional, non-functional, and REST API integration requirements across 6 modules: Product Sync, Order Management, Inventory, Pricing, Approval Workflow, and Analytics Module.
- Produced BRD, 10 Epics with 20+ user stories, and RTM in JIRA. Defined REST API specs (OAuth 2.0, JSON, webhooks) across 6 integration touchpoints (IR-001 to IR-006).
- Performed AS-IS gap analysis and designed TO-BE automated data flows with bidirectional REST API sync, improving operational efficiency by 90% and eliminating manual intervention.
- Established UAT framework with 10+ scenarios; oversaw sprint execution, defect tracking in JIRA, and stakeholder approval for go-live readiness.

2. RetailVista Sales & Profit Analytics Dashboard

Tools: SQL, Power BI, DAX

- Conducted stakeholder elicitation sessions to define 10+ KPIs across sales, profitability, returns, and regional performance; identified near-real-time reporting as the core business requirement and migrated from DirectQuery to Import mode with scheduled refresh, resolving SQL performance bottlenecks.
- Cleaned and pre-processed 10,000+ transactional records using Power Query to remove duplicates, handling null values, and standardizing columns before loading into Power BI for dashboard development.
- Developed interactive Power BI dashboards uncovering +47% YoY sales growth, +49% profit growth, and return rate improvement from 8.74% to 5.79%; delivered insight reports to leadership identifying 3+ high-impact revenue opportunities including loss-making categories and Q4 demand spikes.

3. Healthcare EMR & Patient Portal

Methodology: Agile | **Tools:** JIRA, Confluence, Lucidchart, Figma, SQL, Power BI

- Led requirements workshops with 10+ clinical and administrative stakeholders across patient registration, clinical encounters, billing, and analytics, reducing requirement gaps by 30%.
- Identified 5+ critical AS-IS inefficiencies (duplicate records, manual billing, shared credentials) and designed HIPAA-aligned TO-BE workflows across 6 modules, improving efficiency by 40%.
- Authored BRD and FRD with RBAC for 5+ user personas; structured 6 Epics, 30+ user stories with attached Figma prototypes and wireframes, defined clear acceptance criteria, and maintained full RTM in JIRA.
- Created Power BI dashboards and SQL-based data validation across 4 domains (patient, billing, appointment, operational), replacing manual processes with live reporting at 99%+ KPI accuracy.
- Managed 3 UAT cycles across 30+ scenarios, tracked 20+ defects across critical, high, medium, and low priorities, achieved 95% first-pass sign-off rate, and supported stable production go-live with zero critical defects reported within 3 months.

EDUCATION

MASTER OF BUSINESS ADMINISTRATION (MBA): MARKETING AND BUSINESS ANALYTICS

Sinhgad Institute of Management, Pune | 2021-2023 | CGPA: 7.85 / 10
